Target role: Business Analyst · also Product Analyst, Associate Program Manager

SUMMARY

Business analyst with a psychology background and three years across process design, systems implementation and product operations. Ran an SAP master data migration, automated a billing workflow that improved operational efficiency by 20%, and rebuilt standard operating procedures across functional units. Strongest where a loose requirement has to become documented, repeatable process. Currently completing an MBA in AI for Business at BITS Pilani.

CORE COMPETENCIES

Business Analysis: Requirements gathering and documentation, gap analysis, process and data modelling, SOP writing, stakeholder management, systems implementation.

Data & Systems: SAP master data migration, SQL extraction and automation, Snowflake and AWS S3 pipelines, dashboard reporting, workflow automation.

Tools: SQL, Python, Tableau, Snowflake, AWS S3, SAP BW, Jira, Confluence, Salesforce, Azure OpenAI.

EXPERIENCE

Technical Program Manager — Align Technē Bengaluru

Jul 2024 – Jan 2025

- Ran the SAP master data migration, tracking progress and performance through project visualisation tooling.
- Centralised master data for 200+ materials, streamlining global supply-chain processes.
- Automated billing workflows by querying and unloading SAP BW data from Snowflake into AWS S3 with SQL, improving operational efficiency by 20%.
- Deployed an Azure OpenAI chatbot for 500+ stakeholders, cutting information retrieval from around three minutes to seconds.

Trainee, Talent Transformation & Leadership — Annalect India (Omnicom Group) Bengaluru · Hybrid

Nov 2023 – Jun 2024

- Launched a ride-hailing product for the underage rider segment with 10+ cross-functional teams; the opportunity analysis drove a 10% order increase in that demographic.
- Built Tableau dashboards for go-to-market strategy that supported 10% growth in market reach for new product lines.
- Cut safety risk in high-risk scenarios by 30% using AI models and data-driven strategy, validated through ROI analysis and A/B testing.

AI Data Evaluator & Labeling Specialist — TELUS International Bengaluru · Contract

Jun – Sep 2023; Sep 2024 – Sep 2025

- Prepared structured training datasets across image, text and numerical inputs using Labelbox, Scale AI and SageMaker Ground Truth — bounding boxes, segmentation masks, entity recognition, sentiment and classification.
- Rated AI-generated responses against domain guidelines, and worked with data scientists, project managers and QA to iterate labelling strategy where accuracy was slipping.

AI Trainer — Alignerr Bengaluru · Contract

Apr 2025 – Present

- Label and annotate 2D/3D dental imaging, intraoral scans and X-rays used to train orthodontic treatment-planning models, applying key points, contours and segmentation against clinical standards.
- Work with dental specialists and AI engineers to tighten annotation guidelines where model predictions were weakest, on HIPAA-compliant platforms.

Sales Operations — Think & Learn Pvt Ltd Bengaluru

Jun 2022 – Jun 2023

- Acted as product expert across backend academic operations and customer lifecycle, bridging students, parents and internal teams through onboarding and adoption.
- Analysed engagement data to find drop-off points and fed findings back into platform usability; streamlined workflows with sales and tech to reduce escalation time and improve retention.

PROJECTS

Process Modelling & System Implementation — client onboarding blueprint

- Designed an end-to-end client onboarding blueprint, turning business requirements into access-provisioning checklists and milestone dashboards; automated document handling cut processing time by 40%.

Information Flow Optimisation

- Designed an LLM-based workflow for generating B2B communications, with data models tracking campaign metrics and response rates through automated CRM pipelines.

SpendLens — behavioural spend-intelligence web app

akr246.github.io/spendlens-ai-spend-intelligence

- Took a product from problem statement to live build — wrote the requirements, defined the classification model and success metrics, then shipped it as a React/TypeScript app on GitHub Actions using AI-assisted development.
- Specified six decision engines, including classification with confidence scoring that routes low-confidence cases to human review, and a guardrail service that blocks any recommendation touching an essential expense.

EDUCATION

MBA, Artificial Intelligence for Business — Birla Institute of Technology & Science, Pilani

Apr 2026 – Present

MSc Psychology — St. Agnes Centre for PG Studies & Research, Mangalore

Aug 2019 – Jul 2023

Specialised in behavioural economics and human-computer interaction; coursework in psychological statistics and organisational behaviour.

BSc Psychology — Sahrudaya College of Advanced Studies, Kodakara

2016 – 2019
