Target role: Product Associate · also Associate Product Manager, Product Analyst

SUMMARY

Product professional with a psychology background and three years spanning product operations, technical programme management and AI training data. I have launched a product with ten cross-functional teams, written the spec and the metrics for one I built end to end, and spent a year close to how AI systems actually get trained. Strongest where a loose requirement has to become something a team can build. Currently completing an MBA in AI for Business at BITS Pilani.

CORE COMPETENCIES

Product: Product launch and go-to-market, requirements gathering, PRD writing, user and market analysis, A/B testing, roadmap input, KPI definition.

Delivery: Cross-functional coordination across 10+ teams, technical programme management, stakeholder reporting, SOP documentation.

Tools: SQL, Python, Tableau, Jira, Confluence, Salesforce, Figma, Snowflake, Azure OpenAI, generative-AI workflows.

EXPERIENCE

Trainee, Talent Transformation & Leadership — Annalect India (Omnicom Group) Bengaluru · Hybrid Nov 2023 – Jun 2024

- Launched a ride-hailing product for the underage rider segment with 10+ cross-functional teams; the opportunity analysis drove a 10% order increase in that demographic.
- Cut safety risk in high-risk scenarios by 30% using AI models and data-driven strategy, validated through ROI analysis and A/B testing.
- Built Tableau dashboards for go-to-market strategy that supported 10% growth in market reach for new product lines.
- Worked with engineering and design on new imaging tools, increasing incident resolution efficiency by 30%.

Technical Program Manager — Align Technē Bengaluru Jul 2024 – Jan 2025

- Deployed an Azure OpenAI chatbot for 500+ stakeholders, cutting information retrieval from around three minutes to seconds.
- Automated billing workflows by querying and unloading SAP BW data from Snowflake into AWS S3 with SQL, improving operational efficiency by 20%.
- Centralised master data for 200+ materials, streamlining global supply-chain processes.

AI Trainer — Alignerr Bengaluru · Contract Apr 2025 – Present

- Label and annotate 2D/3D dental imaging, intraoral scans and X-rays used to train orthodontic treatment-planning models, applying key points, contours and segmentation against clinical standards.
- Work with dental specialists and AI engineers to tighten annotation guidelines where model predictions were weakest, on HIPAA-compliant platforms.

AI Data Evaluator & Labeling Specialist — TELUS International Bengaluru · Contract Jun – Sep 2023; Sep 2024 – Sep 2025

- Prepared structured training datasets across image, text and numerical inputs using Labelbox, Scale AI and SageMaker Ground Truth — bounding boxes, segmentation masks, entity recognition, sentiment and classification.
- Rated AI-generated responses against domain guidelines, and worked with data scientists, project managers and QA to iterate labelling strategy where accuracy was slipping.

Sales Operations — Think & Learn Pvt Ltd Bengaluru Jun 2022 – Jun 2023

- Acted as product expert across backend academic operations and customer lifecycle, bridging students, parents and internal teams through onboarding and adoption.
- Analysed engagement data to find drop-off points and fed findings back into platform usability; streamlined workflows with sales and tech to reduce escalation time and improve retention.

PROJECTS

SpendLens — behavioural spend-intelligence web app akr246.github.io/spendlens-ai-spend-intelligence

- Took a product from problem statement to live build — wrote the requirements, defined the classification model and success metrics, then shipped it as a React/TypeScript app on GitHub Actions using AI-assisted development.
- Specified six decision engines, including classification with confidence scoring that routes low-confidence cases to human review, and a guardrail service that blocks any recommendation touching an essential expense.
- Wrote the accompanying PRD covering scope, metrics, competitive position and the published research that argues against the product's own thesis.

Process Modelling & System Implementation

- Designed an end-to-end client onboarding blueprint, turning business requirements into access-provisioning checklists and milestone dashboards; automated document handling cut processing time by 40%.

EDUCATION

MBA, Artificial Intelligence for Business — Birla Institute of Technology & Science, Pilani Apr 2026 – Present

MSc Psychology — St. Agnes Centre for PG Studies & Research, Mangalore Aug 2019 – Jul 2023

Specialised in behavioural economics and human-computer interaction; coursework in psychological statistics and organisational behaviour.

BSc Psychology — Sahrudaya College of Advanced Studies, Kodakara 2016 – 2019
